The Structural Engineer

Journal of The Institution of Structural Engineers

INDEX: Volume 59A Monthly 1981

A

Acceptance criteria of concrete—Correspondence 75
Agricultural snow — *Verulam* 218
Akroyd, T.: President, 1981-82 ..... 121, 277
Progressive collapse revisited—Presidential Address 387
Anchorages:
New Runnymede Bridge — *Discussion* 334
Annual dinner, 1981 ..... 2, 37, 84, 124, 223
Annual Report of Council and Accounts for 1980 134
Antrobus, A.G.: Microcomputers in design — *Verulam* 30
Arbitration:
Progressive collapse revisited (the problem of structural failure) 387
Arches:
Study of the design and construction and a structural analysis of Magdalene Bridge, Cambridge 255
Architects in Agriculture Group — Note 160
Architecture:
Structures in architecture: a study of the creative relationship between structures and architecture 193
Armitage, J.S.: Anatomy and exercise of engineering judgment 167
Arumugasaamy, P.: See Swamy, R.N., and P. Arumugasaamy
Ashby, *Lord:* Hon. Fellow 121, 310
Ashley, S. R.: Microcomputers — *Verulam* 271
AMIStructE — Notes 252, 309
ACE conditions of engagement — Note 252
Awards: See Honours and awards

B

Baker, M.J.: — *Verulam* 112
Bakhoum, M.: Obituary 251
Balconies: — *Verulam* 113, 218
Banerjee, J. R.: See Williams, F.W., and J.R. Banerjee
Bangor:
Superstructure of Bangor District General Hospital 227
Barnard, J.: Pythagoras — *Verulam* 150
Beams:
Commentary on portal frame design 394
Cummins Engine Co.—Shotts factory development 325
Design of beams to CP110: 1972 — *Correction* 172
Natural frequencies of structures for designers — Correspondence 109
Steel portal frames — *Verulam* 77, 181
Beeby, A.W.: Are our Code provisions for slabs safe? 351
Benaim, R.: See Smyth, W.J.R., R. Benaim, and D.H. Philpott
Bending about both axes — *Verulam* 409
Berry, J.S.A.: See Martin, J.N., R.F. Emmerson, and J.S.A. Berry
Bins and bunkers:
Structural engineering at collieries — Discussion 100
Birthday honours — Note 251
Bland, R.: Steel portal frames — *Verulam* 77, 181
Blockley, D.I.: Phil's eight maxims 292
Bobrowski, J.: Design and detailing of concrete structures for fire resistance—the way ahead 133
Bolton, A.: Natural frequencies of structures for designers — Correspondence 109
Bolts:
Commentary on portal frame design 394
Book reviews:
Advances in concrete slab technology: ed. R.K. Dhir and J.G.L. Munday 180
Analysis of structures: H.H. West 248
Applied water resources systems planning: David C. Major and Roberto L. Lenton 372
AJ handbook of building structure, 2nd ed: ed. Allan Hodgkinson 371
Background to buckling: G. Allen and P.S. Bulson 373
Building and engineering claims: W.T. Major and A. Ranson 31
BRE Building research series. 8vols. 248
Carpentry framing and finishing: Byron W. Maguire 124
Changing shape of Latin American architecture: Damain Bayón and Paolo Gasparini 171
Civil engineering procedure, 3rd ed. ICE 371
Composite structures of steel and concrete, vol.2: bridges: R.P. Johnson and R.J. Buckby 342
Computer drafting in construction: Ian Hamilton and David Scoins 342
Concrete international 1980 127
Construction and the related professions: M.C. Fleming 180
Construction of structural steel building frames, 2nd ed.: William G. Rapp 31
Construction research international: ed. Keith Alsop. 2vols. 247
CFA flooring compendium for architects and specifiers: CFA 372
Developments in concrete technology—1: ed. F.D. Lydon 342
Engineering economics: R.L. Mitchell 373
Engineers' computer handbook: R.A. Ryder and E. Malcomson 372
European recommendations for steel construction, 2nd ed. ECCS 31
Fracture mechanics in engineering application: ed. G.C. Sih and S.R. Valluri 375
Ground subsidence: ICE 247
Highway materials, soils and concretes: Harold N. Atkins 31
International construction: ed. S.A. Urry and A.F.C. Sherratt 127

Introduction to soil mechanics and foundations, 3rd ed. C.R. Scott ... 248
Kani on shear in reinforced concrete: ed. M.W. Kani, M.W. Huggins and R.R. Wittkopp ... 373
Limit state design of reinforced concrete sections for normal stresses: Enrico Rota ... 180
Manual on stability of steel structures: ECCS ... 344
Materials management on building sites: Ian E. Chandler ... 124
Nature of structural design and safety: David Blockley ... 371
New approach to the international civil engineering contract: Glyn P. Jones ... 343
Non-linear design of concrete structures: ed. M.Z. Cohn ... 371
Obstacles to mineral development—a pragmatic view: ed. John S. Carmen ... 31
Offshore structures: ed. F.L.L.B. Carneiro and others ... 247
Offshore structures: the use of physical models in their design: ed. G.S.T. Armer and F.K. Garas ... 373
Overseas contracts, conception to completion. ICE. ... 190
Pile foundation analysis and design: H. G. Poulos and E.H. Davis ... 248
Post-yield fracture mechanics: ed. D.G.H. Latzko ... 190
Reinforced and prestressed microconcrete models: ed. F.K. Garas and G.S.T. Armer ... 247
Reinforced concrete design: L. Spiegel and G.F. Limbrunner 124
Reinforced masonry design: Robert R. Schneider and Walter L. Dickey ... 344
Structural analysis and design—some minicomputer applications: ed. H.B. Harrison ... 343
Structures: Daniel L. Schodek ... 372
Swimming pools, 2nd ed.: Philip H. Perkins ... 247
Theory of box girder bridges: V. Kristek ... 372
Thomas Telford; engineer: ed. Alastair Penfold ... 247
Variational, incremental and energy methods in soil mechanics and shell theory: J. Mason ... 190, 247
Brick Development Association award scheme — Note 253
Bricks and brickwork:
Masonry codes CP111 and BS5628—differences, and assessment of draft BS5628 ... 313
Brick diaphragm walls—development, application, design, and future development — Discussion 362
Bridges:
Simple aid for predicting shrinkage and creep strains in buildings and bridges ... 93
Study of the design and construction and a structural analysis of Magdalene Bridge, Cambridge ... 255
New Runnymede Bridge — Discussion 334
Bridle, R.: — Note 1
Building and buildings:
BS5502 in use—code of practice for the design of buildings and structures for agriculture ... 279
Connections in structural steelwork for buildings — Discussion 408
Cummins Engine Co.—Shotts factory development ... 325
Design and construction of Kwai Chung Incinerator, Hong Kong — Discussion 242
Hybrid structures — *Verulam* 76
Learn to live without CP114 — Open Discussion 209
Masonry codes CP111 and BS5628—differenced, and assessment of draft BS5628 ... 313
PSA competition conditions ... 270
PSA competition conditions — Note 253
Simple aid for predicting shrinkage and creep strains in buildings and bridges ... 93
Second order effects and elastic critical loads of plane, multistorey, unbraced frames ... 125
Superstructure of Bangor District General Hospital ... 227
Timber trussed rafters for roofs — Discussion 263
Building materials — Note 3
Building Regulations — Notes 37, 84, 123, 159, 191, 223, 253, 348
— *Verulam* 111, 339
BRE items — Notes 38, 85
Bullock, T.: Obituary ... 381
Burbage, R.S.: See Rose, G.M., and R.S. Burbage
Burland, J.: — Note 121

C

Caldecote, *Lord:* — Note 275
Cambridge:
Study of the design and construction and a structural analysis of Magdalene Bridge, Cambridge ... 255
Canada:
Presidential visit, 1981 — Report 385
Carpenter, J.: — *Verulam* 30
Cement:
Structural uses of high alumina cement concrete—synopsis of the final report of the IStructE Informal Study Group ... 201
Christie, S.P.: — Note 1
Chung, H.W.: Acceptance criteria of concrete — Correspondence 75
Civil Engineering Innovation Competition — Note 85
Clark, B.E.: Design of beams to CP110:1972 — Correspondence 172
Clarke, S.: Steel portal frames — *Verulam* 181
Clay soils:
Importance of the stress histories of cohesive soils and the cone penetration test ... 87
Cleland, D.J.: See Long, A.E., and D.J. Cleland
Clift, M., and I.B. Meeke: Developments in the design of buoyant ferry ramps — Discussion 357
Cockerill, R.: Padstones in blockwork — *Verulam* 150
Cocks, N.A.: Limit state design — *Verulam* 272
Codes of Practice:
Are our Code provisions for slabs safe? ... 351
Acceptance criteria of concrete — Correspondence 75
BS5502 in use—Code of Practice for the design of buildings and structures for agriculture ... 279
Design of beams to CP110:1972 — Correspondence 172
Learn to live without CP114 — Open Discussion 209
Limit state codes — *Verulam* 272
Masonry codes CP111 and BS5628—differences, and assessment of draft BS5628 ... 313
Progressive collapse revisited—the problem of structural failure ... 387
Reinforced masonry — Note 191
Simple codes can stifle technology ... 392
Stability and code anomalies — *Verulam* 218
Structural requirements of low-rise housing — Note 123
Timber trussed rafters for roofs — Discussion 263
Verulam ... 30,181
Codes of Practice: See also Standards and Codes
Collett, G.T.: — *Verulam* 295, 338
Colleries:
Structural engineering at collieries — Discussion 100
Columns:
Commentary on portal frame design ... 394
Cummins Engine Co.—Shotts factory development ... 325
Equivalent frame method for slab-column structures ... 161
Simple aid for predicting shrinkage and creep strains in buildings and bridges ... 93
Superstructure of Bangor District General Hospital ... 227
Computation:
Natural frequencies of structures for designers — Correspondence 109
Computer aided design:
Computer analysis: study of the design and construction and a structural analysis of Magdalene Bridge, Cambridge ... 255
Computer drafting techniques — *Verulam* 76
Microcomputers in design — *Verulam* 30, 151, 182, 271
Concrete:
Acceptance criteria of concrete — Correspondence 75
Are our Code provisions for slabs safe? ... 351
Design and detailing of concrete structures for fire resistance—the way ahead ... 133
High alumina cement concrete—appraisals, the problems, and some findings — correction 78
High alumina cement concrete — Note 192
Learn to live without CP114 — Open Discussion 209
Museum of historic concrete — Note 123

New Runnymede Bridge — Discussion 334
Service reservoir design, with particular reference to economics and the 'simply supported wall' concept 285
Structural uses of high alumina cement concrete—synopsis of the final report of the IStructE Informal Study Group 201
Superstructure of Bangor District General Hospital 227
Cone penetration tests:
The importance of the stress histories of cohesive soils and the cone penetration test 87
Connections:
Connections in structural steelwork for buildings — Discussion 405
General tabular method for elastic and plastic analysis of eccentrically loaded fastener groups 202
— correction 356
Moment connections in structural steelwork—a review of present trends and design problems — Synopsis 176
Construction and construction industry:
New Runnymede Bridge — Discussion 334
Superstructure of Bangor District General Hospital 227
Tunnel design—philosophy and practice — Discussion 128
Continuing Professional Development in Construction Group — Note 348
Contractors:
Tunnel design—philosophy and practice — Discussion 128
Contracts:
ACE conditions of engagement — Note 276
Progressive collapse revisited—the problem of structural failure 387
Structural engineers and the law — Discussion 173
Copyright: — *Verulam* 339
Costing:
Service reservoir design, with particular reference to economics and the 'simply supported wall' concept 285
CEI news: 4, 74, 186, 221, 270, 294, 344, 377, 416

Volume 59B R & D Quarterly 1981

The Structural Engineer

Journal of The Institution of Structural Engineers

INDEX: Volume 59B R & D Quarterly 1981

A

Absorbers:
- Two case studies in the use of tuned vibration absorbers on footbridges 27

Allison, R.W.: See Johnson, R.P., and R.W. Allison

Axial loads:
- Influence of low strength concrete beams on the axial load capacity of concrete columns 17

B

Bandyopadhyay, J.N., and D.P. Ray: Comparative study of shell characterististics of hyperbolic paraboloid shell structures — Synopsis 9
- Comparative study of shell characteristics of paraboloid of revolution shell structures — Synopsis 66
- Experimental investigation of reinforced concrete hyperbolic paraboloid shell structures — Synopsis 41

Beams:
- Experimental investigation of reinforced concrete hyperbolic paraboloid shell structures — Synopsis 41
- Influence of low-strength concrete beams on the axial load capacity of concrete columns 17
- Shrinkage and tension stiffening in negative moment regions of composite beams 10
- Two case studies in the use of tuned vibration absorbers on footbridges 27

Behaviour of brick masonry shear walls 42

Bending:
- Comparative study of shell characteristics of hyperbolic paraboloid shell structures — Synopsis 9
- Comparative study of shell characteristics of paraboloid of revolution shell structures — Synopsis 66
- Shrinkage and tension stiffening in negative moment regions of composite beams 10
- Ultimate strength of thin-walled sections under compression and bending — Synopsis 16

Bricks and brickwork:
- Behaviour of brick masonry shear walls 42
- Non-linear finite element computer model for structural clay brickwork — Synopsis 40

Bridges:
- Two case studies in the use of tuned vibration absorbers on footbridges 27

Buildings:
- Torsion analysis for tube-in-tube buildings — Synopsis 41

C

Cantilever construction:
- Influence of low strength concrete beams on the axial load capacity of concrete columns 17

Cladding:
- Factors affecting the racking resistance of timber framed panels 49

Columns:
- Influence of low-strength concrete beams on the axial load capacity of concrete columns 17

Comparative study of shell characteristics of hyperbolic paraboloid shell structures — Synopsis 9

Comparative study of shell characteristics of paraboloid of revolution shell structures — Synopsis 66

Compression:
- Ultimate strength of thin-walled sections under compression and bending — Synopsis 16

Computer programs:
- Non-linear finite element computer model for structural clay brickwork — Synopsis 40
- Torsion analysis for tube-in-tube buildings — Synopsis 41

Concrete:
- Experimental investigation of reinforced concrete hyperbolic paraboloid shell structures — Synopsis 41
- Influence of low-strength concrete beams on the axial load capacity of concrete columns 17
- Shrinkage and tension stiffening in negative moment regions of composite beams 10

Core buildings:
- Torsion analysis for tube-in-tube buildings — Synopsis 41

Cracking:
- Behaviour of brick masonry shear walls 42
- Experimental investigation of reinforced concrete hyperbolic paraboloid shell structures — Synopsis 41
- Non-linear finite element computer model for structural clay brickwork — Synopsis 40
- Shrinkage and tension stiffening in negative moment regions of composite beams 10

D

Deformation:
- Fatigue strength of screwed fastenings in thin sheet components 33

Design, structural:
- Influence of low-strength concrete beams on the axial load capacity of concrete columns 17

E

Evaluation of the random maximum load capacity of a steel truss girder arising from the condition of failure of the tension member — Synopsis 26

Experimental investigation of reinforced concrete hyperbolic paraboloid shell structures — Synopsis 41

Eyre, R.: See Jones, R.T., A.J. Pretlove, and R. Eyre

F

Factors affecting the racking resistance of timber framed panels 49
Fastenings:
Fatigue strength of screwed fastenings in thin sheet components 33
Fatigue strength of screwed fastenings in thin sheet components 33
Failures:
Behaviour of brick masonry shear walls 42
Evaluation of the random maximum load capacity of a steel truss girder arising from the condition of failure of the tension member — Synopsis 26
Finite element method:
Non-linear finite element computer model for structural clay brickwork —Synopsis 40
Footbridges:
Two case studies in the use of tuned vibration absorbers on footbridges 27
Frames:
Factors affecting the racking resistance of timber framed panels 49
Simplified method for evaluating the natural frequencies and corresponding modal shapes of multistorey frames 1
— Correspondence 64

G

Ganju, T.N.: Non-linear finite element computer model for structural clay brickwork — Synopsis 40
Georgoussis, G.K., and Phipps, M.E.: Influence of low-strength concrete beams on the axial load capacity of concrete columns 17
Girders:
Evaluation of the random maximum load capacity of a steel truss girder arising from the condition of failure of the tension member — Synopsis 26
Griffiths, D.R.: See Robertson, R.A., and D.R. Griffths
Grochowski, A.: See Sieczkowski, J., and A. Grochowski

H

Hendry, A.W.: See Samarasinghe, W., A.W. Page, and A.W. Hendry
Houses:
Factors affecting the racking resistance of timber framed panels 49

I

Influence of low-strength concrete beams on the axial load capacity of concrete columns 17

J

Johnson, R.P., and R.W. Allison: Shrinkage and tension stiffening in negative moment regions of composite beams 10
Joints:
Influence of low-strength concrete beams on the axial load capacity of concrete columns 17
